DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, 14-26, 31-41 and 52-87 drawn to a method of manufacturing an article, classified in class 264, subclass 1.1.
 - II. Claims 12,13,27-30 and 42-51 drawn to an article formed, classified in class 428, subclass 543.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the article as claimed can be made by coating a preformed article.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their divergent subject matter, restriction for examination purposes as indicated is proper.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yewebdar T Tadesse whose telephone number is (571)
